Re: Michael Bawden of Proline Protection

To whom it may concern,

It is with great pleasure that we can recommend Proline Protection to you as our only choice for Security guard services. Proline Protection has been our security service at TechInSA for these past three years and will continue to be.

At TechInSA we have a wide array of security needs including on site security, patrols, after hours deliveries, alarm activations and general security maintenance. Since moving to Proline Protection in 2016, we have had no regrets about our move to a company that has exceeded all of our security needs.

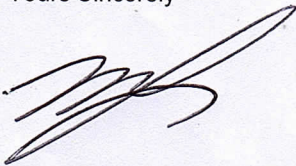

Our organisation has found Proline to be exemplary in their duty and found their CEO, Michael Bawden to be extremely respectful, diligent and forthright in his dealings with us. The guards supplied by Proline Protection are always well groomed, respectful and respected by TechInSA.

The nature of our Business and our security needs are quite complex. Proline interacts with a multiple number of our departments on a daily and weekly basis.

We have used Proline for static guard services as well as our only onsite security team. It has been because of their superior service level over the last three years, that we will continue to choose Proline Protection for our security service moving forward.

We have great pleasure in recommending them to you

Yours Sincerely
